

# AAA *How to Drive*: Recommended Content Segments for 30-Hour Classroom Program

September 2020

**Purpose:** Provide a suggested set of content segments and exercises to conduct a 30-hour Classroom program.

## Using this Document:

- The How to Drive curriculum is designed to meet the national driver education standards, which call for 45 hours of classroom training.
  - However, many states conduct classroom programs using a 30 hour timeframe.
  - This document offers recommendations on core content segments to cover and not cover.
- The cells **highlighted in yellow** represent content segments that schools might find reasonable to skip to achieve a 30-hour timeframe.
- These are only recommendations- feel free to adjust and alter the sequence to match your needs and your state's requirements.

**Please Note that it is recommended that both the Introduction and Summary chapters be delivered in their entirety.**

## CHAPTER 1: WELCOME TO YOUR DRIVING LIFE! Content Outline

| Instructor Guide Content Segment                                            | Page(s)   | Instructor Guide Content Segment                                                 | Page(s)     |
|-----------------------------------------------------------------------------|-----------|----------------------------------------------------------------------------------|-------------|
| <b>Welcome to Your Driving Life!</b><br>Chapter Objectives Overview         | 1-1       | Bonus Content – Vehicle Crash Testing                                            | 1-7         |
| Chapter Pre-Assessment                                                      | 1-2       | Optional Web-Based Exercise – Look Up Crash Test Results                         | 1-8         |
| Chapter Introduction                                                        | 1-2 – 1-3 | Instruction and Discussion – The Highway Transportation System (HTS): Road Users | 1-8 – 1-9   |
| <b>1.1 Introduction</b>                                                     | 1-3       | Instruction and Discussion – Crash Risk and Becoming a Safe Driver               | 1-10        |
| Instruction and Discussion – Introduction                                   | 1-3       | Crash Factor Exercises                                                           | 1-10 – 1-12 |
| <b>1.2 The Driver's License</b>                                             | 1-3       | Instruction and Discussion – Crash Risk and Becoming a Safe Driver (cont'd)      | 1-12        |
| Warm-Up Question                                                            | 1-3       | Student Reflection – Becoming a Safe Driver                                      | 1-12        |
| Instruction and Discussion – The Driver's License                           | 1-4       | Bonus Content – The Highway Transportation System (HTS)                          | 1-12 – 1-13 |
| Instruction and Discussion – The Highway Transportation System (HTS): Roads | 1-4 – 1-5 | <b>1.3 The Facts About Teen Driving</b>                                          | 1-13        |
| Bonus Content – Roadside Features Testing                                   | 1-5 – 1-6 |                                                                                  |             |
| Instruction and Discussion – The Highway Transportation System: Vehicles    | 1-6       |                                                                                  |             |

|--------------------------------------------------------------------------------------------------------------|-------------|------------------------------------------------------------------------------------|-------------|
| <b>Chapter 3</b> Objectives Overview                                                                         | 3-1         | Instruction and Discussion – Features and Conditions that Affect Traction          | 3-14        |
| Chapter Pre-Assessment                                                                                       | 3-2         | Exercise – Traction Experiment                                                     | 3-14 – 3-15 |
| Chapter Introduction                                                                                         | 3-2         | Bonus Content – Wet Leaves on the Roadway                                          | 3-15        |
| <b>3.1 Vehicle Controls and Visual Input</b>                                                                 | 3-3         | Instruction and Discussion – Features and Conditions that Affect Traction (cont'd) | 3-15 – 3-18 |
| Warm-Up Question                                                                                             | 3-3         | Student Reflection – Traction                                                      | 3-18        |
| Optional Discussion – Interview with an Experienced Driver Take-Home Exercise                                | 3-3         | Checking for Understanding                                                         | 3-18 – 3-19 |
| Optional Activity – Combine the Interview Results into a Whole-Class Summary                                 | 3-3         | DriverZ.E.D. – Segment 3                                                           | 3-20 – 3-21 |
| Optional Discussion – Vehicle Features and Status Inventory                                                  | 3-4         | <b>3.4 Natural Laws and Traction</b>                                               | 3-22        |
| Optional Activity – Combine the Inventory Results into a Whole-Class Summary                                 | 3-4         | Warm-Up Question                                                                   | 3-22        |
| Instruction and Discussion – Vehicle Controls and Visual Input                                               | 3-4 – 3-5   | Optional Exercise – Traffic Laws vs. Natural Laws                                  | 3-22        |
| Optional Exercise – Multitasking #2                                                                          | 3-6 – 3-7   | Instruction and Discussion – Inertia, Gravity, and Kinetic Energy                  | 3-23        |
| Application – Visual Input                                                                                   | 3-7         | Optional Exercise – Penny for Your Thoughts on Inertia                             | 3-24        |
| <b>3.2 Vehicle Operating Space</b>                                                                           | 3-7         | Instruction and Discussion – Inertia, Gravity, and Kinetic Energy (cont'd)         | 3-24 – 3-25 |
| Warm-Up Question                                                                                             | 3-7         | Optional Content – Natural Laws and Movement                                       | 3-25        |
| Instruction and Discussion – Purpose of Operating Space, Varying Space Needs, and Miscalculating Space Needs | 3-8 – 3-9   | Optional Exercise – Momentum Bashing 1                                             | 3-25        |
| Instruction and Discussion – Visual Control Zone and Visual Referencing                                      | 3-9         | Optional Exercise – Momentum Bashing 2                                             | 3-26        |
| Exercise – Rule of Thumb                                                                                     | 3-10        | Instruction and Discussion – Inertia, Gravity, and Kinetic Energy (cont'd)         | 3-26 – 3-28 |
| Instruction and Discussion – Reference Points                                                                | 3-11        | Optional Content – Yaw                                                             | 3-29        |
| Optional Exercise – Which of Your Eyes is Dominant?                                                          | 3-11 – 3-12 | Optional Classroom Activities – Understanding Car Crashes: It's Basic Physics      | 3-29        |
| <b>3.3 Traction and Road Surfaces</b>                                                                        | 3-12        | Wrap-Up – Natural Laws and Traction                                                | 3-29        |
| Warm-Up Question                                                                                             | 3-12        | <b>3.5 Vehicle Suspension, Weight Transfer, and Traction</b>                       | 3-30        |
| Instruction and Discussion – Traction and Surfaces                                                           | 3-12 – 3-13 | Warm-Up Question                                                                   | 3-30        |
| Road Surfaces Quiz                                                                                           | 3-13        |                                                                                    |             |

## CHAPTER 3: VEHICLE SPACE NEEDS, NATURAL LAWS, AND TRACTION CONTINUED

| <b>Starting, Steering, and Stopping Objectives Overview</b>                 | 4-1         | <b>Warm-Up Question</b>                                                  | 4-22        |
| Chapter Pre-Assessment                                                      | 4-2         | Instruction and Discussion – Steps to Accelerate                         | 4-22 – 4-23 |
| <b>Chapter Introduction</b>                                                 | 4-2         | Instruction and Discussion – Technique and Levels of Acceleration        | 4-23        |
| <b>4.1 Starting the Engine</b>                                              | 4-3         | <b>4.5 Braking and Deceleration</b>                                      | 4-24        |
| <b>Warm-Up Question</b>                                                     | 4-3         | <b>Warm-Up Question</b>                                                  | 4-24        |
| <b>Optional – Review of Behind-the-Wheel Training</b>                       | 4-3         | Instruction and Discussion – Braking and Levels of Deceleration          | 4-24 – 4-25 |
| Instruction and Discussion – Good Habits for Before you Start the Engine    | 4-3         | Instruction and Discussion – Braking and Levels of Deceleration (cont'd) | 4-25 – 4-27 |
| <b>Exercise – Steps for Starting the Engine</b>                             | 4-4         | <b>Exercise – Levels of Acceleration and Deceleration</b>                | 4-27        |
| Instruction and Discussion – Starting the Engine                            | 4-5         | Instruction and Discussion – Practicing, Signaling, and Stopping         | 4-28 – 4-30 |
| Instruction and Discussion – Starting Manual, Electric, and Hybrid Vehicles | 4-5 – 4-6   | Instruction and Discussion – Anti-lock Braking Systems                   | 4-31        |
| <b>4.2 Steering the Vehicle</b>                                             | 4-7         | <b>Optional – Braking without ABS</b>                                    | 4-32        |
| <b>Warm-Up Question</b>                                                     | 4-7         | <b>Optional – Braking with Right Foot vs. Left Foot</b>                  | 4-32 – 4-33 |
| Instruction and Discussion – Steering                                       | 4-7 – 4-8   | <b>Checking for Understanding</b>                                        | 4-33 – 4-34 |
| Instruction and Discussion – Steering (cont'd)                              | 4-8         | <b>Brain Break #1</b>                                                    | 4-34 – 4-35 |
| <b>Exercise – Steering Practice: Hand Positioning and Turning</b>           | 4-9 – 4-10  | <b>4.6 Backing</b>                                                       | 4-35        |
| Instruction and Discussion – Visual Targets and Passing Nearby Objects      | 4-10 – 4-11 | <b>Warm-Up Question</b>                                                  | 4-35        |
| Exercise – Potential Steering Errors                                        | 4-11 – 4-12 | Instruction and Discussion – Backing                                     | 4-36 – 4-37 |
| Instruction and Discussion – Steering Errors and Corrections                | 4-13        | Instruction and Discussion – Steering While Backing                      | 4-38        |
| <b>Checking for Understanding</b>                                           | 4-14        | Instruction and Discussion – Backup Cameras                              | 4-39        |
| DriverZ.E.D. – Segment 4                                                    | 4-15 – 4-19 | <b>Exercise – Steering While Backing</b>                                 | 4-40        |
| <b>4.3 Positioning Your Feet</b>                                            | 4-20        | <b>4.7 Stopping and Securing the Vehicle</b>                             | 4-40        |
| <b>Warm-Up Question</b>                                                     | 4-20        | <b>Warm-Up Question</b>                                                  | 4-40        |
| Instruction and Discussion – Positioning Your Feet                          | 4-20 – 4-21 | Instruction and Discussion – Stopping and Securing the Vehicle           | 4-41 – 4-42 |
| <b>Student Reflection – Footwear</b>                                        | 4-21        | Instruction and Discussion – The Dutch Reach                             | 4-42 – 4-45 |
| <b>4.4 Accelerating the Vehicle</b>                                         | 4-22        |                                                                          |             |

## CHAPTER 4: STARTING, STEERING, AND STOPPING CONTINUED

| <b>Warm-Up Question</b>                                                                | <b>19-4</b>   | Instruction and Discussion – Automatic Crash Notification        | 19-23 – 19-25        |
| Introduction                                                                           | 19-4          | <b>19.5 Automated Driving Tasks</b>                              | 19-25                |
| Exercise – Potential Benefits of Vehicle Technologies                                  | 19-5          | <b>Warm-Up Question</b>                                          | <b>19-25</b>         |
| Introduction (cont'd)                                                                  | 19-5 – 19-6   | Instruction and Discussion – Adaptive Cruise Control             | 19-25 – 19-26        |
| Exercise                                                                               | 19-6          | Instruction and Discussion – Adaptive Cruise Control             | 19-26 – 19-27        |
| Introduction (cont'd)                                                                  | 19-7 – 19-9   | Instruction and Discussion – Dynamic Driving Assistance          | 19-27                |
| Instruction and Discussion – Using Vehicle Technology Appropriately                    | 19-10         | <b>19.6 Miscellaneous Driving Aids</b>                           | 19-28                |
| Exercise                                                                               | 19-10 – 19-11 | <b>Warm-Up Question</b>                                          | <b>19-28</b>         |
| Instruction and Discussion – Using Vehicle Technology Appropriately (cont'd)           | 19-11 – 19-12 | Instruction and Discussion – Dynamic Driving Assistance          | 19-28                |
| <b>19.2 Parking Assistance</b>                                                         | 19-12         | <b>Optional Content</b>                                          | <b>19-28 – 19-29</b> |
| <b>Warm-Up Question</b>                                                                | <b>19-12</b>  | Instruction and Discussion – Adaptive Headlights                 | 19-29 – 19-30        |
| Instruction and Discussion                                                             | 19-12 – 19-14 | Instruction and Discussion – Navigation                          | 19-30                |
| <b>19.3 Collision Alerts</b>                                                           | 19-14         | Instruction and Discussion – “Child / Pet In Car” Reminder       | 19-31                |
| <b>Warm-Up Question</b>                                                                | <b>19-14</b>  | Instruction and Discussion – Driver Monitoring Systems           | 19-31 – 19-32        |
| Instruction and Discussion                                                             | 19-15         | <b>19.7 Vision / Perception Enhancement Technologies</b>         | 19-33 – 19-35        |
| Instruction and Discussion – Object Detection and Forward Collision Warning            | 19-15 – 19-16 | <b>19.8 Traction-Related Technology</b>                          | 19-35 – 19-37        |
| Instruction and Discussion – Lane Departure Warning                                    | 19-16 – 19-17 | <b>19.9 Road, Communication, and Security Technology</b>         | 19-38 – 19-42        |
| Instruction and Discussion – Blind Spot Warning                                        | 19-17 – 19-20 |                                                                  |                      |
| Instruction and Discussion – Rear Cross Traffic Warning                                | 19-20         |                                                                  |                      |
| <b>19.4 Collision Mitigation</b>                                                       | 19-20         |                                                                  |                      |
| <b>Warm-Up Question</b>                                                                | <b>19-20</b>  |                                                                  |                      |
| Instruction and Discussion – Electronic Stability Control                              | 19-21         |                                                                  |                      |

## CHAPTER 19: VEHICLE SAFETY TECHNOLOGY AND SELF-DRIVING VEHICLES CONTINUED
